I, the undersigned, do hereby submit the following information to the Department of Water Resources as a filing of information to remove a water control structure.

GENERAL INFORMATION

This Notification should include a map from an actual survey, aerial photo or topographic map. The size of the map shall be 8½ by 11 inches. The map shall have a north arrow and approximate scale.

Proposed Project Activity Is A

- Breach
- Removal

Structure Is A

- Dam / Type Of Construction _____
- Dike
- Other _____

Does Structure Have A Construction Permit Associated With It

- Yes
- No

If Yes, What Is The Permit Number

If No, Provide The Following Information

Height (feet)	Length (feet)	Top Width (feet)	Side Slopes/Upstream/Exterior:1	Side Slopes/Downstream/Interior:1
---------------	---------------	------------------	---------------------------------	-----------------------------------

For Dams: Surface Acres At Normal Operating Level (acres)

Volume At Normal Operating Level (acre-feet)

Does Structure Have A Water Use Permit Associated With It

- Yes
- No

If Yes, What Is The Permit Number

What Year Was Structure Constructed

By Whom

Does The State Of North Dakota Hold An Easement For This Structure

- Yes (If Yes, Please Provide A Copy)
- No

Location

Location Description: Nearest Forty-Acre Tract	1/4	1/4	Section	Township	Range
--	-----	-----	---------	----------	-------

Structure Is Located In Which Water Resource District

Waterway On Which Structure Is Located

A Tributary To

Breach/Removal Contractor, If Known

Anticipated Start Date

Anticipated Completion Date

ADDITIONAL INFORMATION, AND SIGNATURE

Reason For Removing Structure

Describe Method Of Breach/Removal				
Note: To be considered breached, a large enough section of the embankment should be removed so that the dam is no longer capable of storing water. The dam should be breached to the original streambed elevation.				
How And Where Is Embankment / Structural Material Disposed Of <input type="checkbox"/> Disposed of <input type="checkbox"/> Stabilized				
Reservoir Sediment Is Being				
How And Where Will It Be Disposed Of				
How Will It Be Stabilized				
Distance To Closest Downstream	House (feet)	Building (feet)	City (feet)	Road (feet)
